

Transfer Treatment Training

## Guldmann Slings Turning and Repositioning

The comprehensive Guldmann line of slings includes a variety of styles and sizes for turning, transferring and repositioning, while avoiding unnecessary strain to the care provider. Whether it's for changing bed linen, carrying out personal hygiene procedures, wound treatment, or dressings, repositioning the user in bed, placing wedges or X-ray cassettes under the user, or reducing friction between the user and the surface, there is a Guldmann sling to help you achieve your goals.

## Progressive Mobility Consultants Influencing attitudes

You may already know that Guldmann provides industry-leading safety technology—but you might not know that our teaching and education team is also a leader in the field. Our Progressive Mobility Consultants are respected for the knowledge, creativity, and energy they bring to every client interaction.

### Free up more Time to Care

Let a Progressive Mobility Consultant handle your Sling Assessment, saving staff time and improving safety. They'll inspect for expired or unsafe slings, remove them from use, and conduct an on-site inventory to ensure you have the right quantity, styles, and sizes.

## Transfer, Treatment & Training

We offer a wide range of slings tailored to individual needs, including solutions for children, bariatric patients, and those with specific conditions affecting body control, muscle strength, or mobility. Available in various designs, sizes, and materials, our slings accommodate diverse care requirements—ensuring the right fit for every patient.
