Rehabilitation & Recovery

Gait Trainer Sling

The Gait Trainer is a walking sling for users who have sufficient leg strength to stand upright, but need support and to feel safe during training due to reduced balance. The Gait Trainer sling provides the needed support during walking and gait training and helps the user maintain standing.

The sling supports the upper part of the body and has leg cuffs for enhanced safety. The Gait Trainer is ideal for balance training, different kinds of standing or sitting exercises, gait training, and provides confidence and safety for both user and caregiver.

Progressive Mobility Consultants Influencing attitudes

You may already know that Guldmann provides industry-leading safety technology—but you might not know that our teaching and education team is also a leader in the field. Our Progressive Mobility Consultants are respected for the knowledge, creativity, and energy they bring to every client interaction.

Free up more Time to Care

Let a Progressive Mobility Consultant handle your Sling Assessment, saving staff time and improving safety. They'll inspect for expired or unsafe slings, remove them from use, and conduct an on-site inventory to ensure you have the right quantity, styles, and sizes.

Transfer, Treatment & Training

We offer a wide range of slings tailored to individual needs, including solutions for children, bariatric patients, and those with specific conditions affecting body control, muscle strength, or mobility. Available in various designs, sizes, and materials, our slings accommodate diverse care requirements—ensuring the right fit for every patient.
